Declaration of Compliance

Description	Material	Article Number
Glass	*PS*	157176

Duni declares that the article meets the requirements of:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP)
- EU Regulation 10/2011/EC with amendments (Plastic regulation)
- EU Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and other bisphenols
- Article 5 of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) regarding the restriction of per- and polyfluoroalkyl substances (PFAS) and heavy metals

This plastic product has been manufactured only with monomers, other starting substances and additives that are authorized under Regulation (EC) 10/2011 and all amendments. A risk assessment according to Article 18 and Article 19 of Regulation (EC) No. 10/2011 has been performed for this product.

Overall migration
According to the above-mentioned regulations, the overall migration does not exceed 10 mg/dm² or 60 mg/kg.

Specific migration
The material does not contain monomers or additives subject to restrictions under the plastic regulation 10/2011 and its amendments.

Area of use
The product is intended for contact with cold and ambient-temperature food and beverages. The material can withstand temperatures up to 90°C; however, due to the design and intended use of the product, hot beverages should not be served in these glasses as this may cause deformation of the product and increase the risk of burns.

Microwave use: Not suitable for use in microwave ovens.

Freezing: Suitable for contact with frozen food and beverages. However, prolonged freezer storage is not recommended due to the material properties of polystyrene.

Test conditions
Migration tests on the material of the article performed by an independent institute showed that under the following test conditions overall migration and specific migration fall below the respective limits given by regulation 10/2011.

Overall migration

Simulant	***Contact time***	***Temperature***	***Result (mg/dm²)***
3% Acetic acid	*10 days*	*40°C*	*< 10*
50 % Ethanol	*10 days*	*40°C*	*< 10*
Olive oil	*10 days*	*40°C*	*< 10*

Ratio of food contact surface area to volume of component used to establish the compliance of material is 6 dm²/kg.

The trays comply with the general restrictions of Regulation (EC) No. 10/2011 Annex 2 regarding heavy metals and PAA content.

No substances of dual use are added to the product.

This document of compliance is based on:
- Documentation from suppliers
- Migration analysis

To the best of our knowledge, the information provided is accurate and reliable as of the date of publication and, where relevant, reflects the information received from suppliers. It is valid from the stated issue date until it is replaced or superseded.
